Summary

Staff Frontend Platform Engineer with 15+ years of experience architecting and building scalable frontend platforms and UI ecosystems across enterprise and high-scale environments. Known for designing reusable component systems, improving developer velocity, and delivering performant React and TypeScript applications. Proven leader in building multi-tenant platforms, unified design systems, and shared component libraries that accelerate product development and improve quality. Experienced in defining frontend architecture, establishing engineering standards, and driving cross-team adoption across distributed organizations.

Key Engineering Impact

- Reduced redundant front-end development by ~40% by introducing a shared component architecture adopted across multiple digital initiatives.
- Authored architecture for Amazon's next-generation promotions platform, unifying Selling Partner interfaces across Seller and Vendor Central.
- Re-architected a legacy vehicle locator into a single-page application, improving page performance by ~80%.
- Designed an enterprise frontend component platform aligned with a design system, enabling reusable UI development across multiple teams.

Core Expertise

Frontend Platform Architecture: Design systems • Component libraries • Multi-tenant UI systems • Scalable SPA architecture • Monorepo strategy • Shared package architecture

Leadership & Influence: Technical roadmapping • Cross-team alignment • Mentorship & code review standards • Architectural decision frameworks • Agile delivery leadership

Technologies: React • TypeScript • Node.js • REST APIs • Tailwind CSS • Web Components • Adobe Experience Manager (AEM) • Webpack/Vite • Storybook • CI/CD pipelines • GitHub Actions • AWS

Experience

Senior Software Consultant

Travel+Leisure, Co.

Oct 2023 - Present

Orlando, FL (remote)

- Architected and led delivery of a multi-tenant Adobe Experience Manager (AEM) platform enabling multi-brand expansion, including launch of the Sports Illustrated Resorts marketing site.
- Designed component-driven front-end architecture enabling non-technical marketing teams to configure digital experiences through reusable AEM authoring components.
- Designed and implemented an enterprise web component library aligned with the company design system, adopted across multiple digital initiatives.
- Introduced shared component architecture adopted across multiple digital initiatives, reducing redundant front-end development by ~40%.
- Established governance and contribution standards for reusable UI components to ensure long-term scalability.
- Served as de facto technical lead on a high-visibility initiative, driving architectural decisions and cross-team alignment under ambiguity.
- Leveraged AI-assisted development (Cursor, Claude Code) to build automated content migration tooling from a legacy AEM instance to modernized components.
- Prototyped Figma MCP integration within web component library to streamline component creation and updates.

Experience (con't)

Front-End Engineer II

Jul 2019 - Sept 2023

Amazon

Tempe, AZ

- Authored architecture for Amazon's next-generation promotions platform, unifying Selling Partner interfaces across Seller and Vendor Central.
- Delivered React-based seller tooling used by first- and third-party merchants operating across Amazon's global marketplaces.
- Designed pan-region deal management capability enabling sellers to manage cross-country promotions through a unified experience.
- Co-founded a front-end engineering committee to improve testing strategy, integration standards, and cross-team knowledge sharing.
- Introduced regular front-end office hours to address developer productivity gaps and improve engineering alignment.
- Mentored intern and junior engineers through onboarding, architecture discussions, and design/code reviews.

General Motors

Chandler, AZ

Lead UI Developer / Team & Platform Lead

Feb 2017 - Jul 2019

- Led 7-engineer core UI team for the responsive redesign of Buick.com, coordinating across distributed platform teams.
- Oversaw sprint planning, architecture reviews, CI/CD processes, code reviews, and production deployments.
- Partnered with QA and product to identify and resolve platform defects and performance issues.
- Contributed to ongoing CMS architecture evolution and technical debt reduction initiatives.

Senior/Lead UI Developer

Jun 2014 - Jan 2017

- Re-architected legacy vehicle locator application into single-page Angular application, improving performance by ~80%.
- Led Opel Germany platform refresh, running team meetings and collaborating closely with business analysts to refine user stories.
- Contributed to insourcing and architectural evolution of CMS platform (Adobe CQ 5.4) powering 275+ global brand sites, reducing annual vendor costs by millions.
- Developed internal open-source contribution model for enterprise web components (pure ES6 custom elements), including Git standards, ESLint rules, and implementation documentation.

Early Career Experience

Senior Associate / Web Development Leadership - *Trellist, Inc.* (2010-2014)

Flash Developer - *CNBC, NFL Films* (2000-2009)

Early career focused on interactive media, dynamic web applications, front-end performance, and client collaboration across enterprise brands.

Education

Associate Degree in Specialized Technology, Animation/Media Arts
The Art Institute of Philadelphia, Philadelphia, PA

December 1996
